

Student Worksheet

Bug-Out Bag (BoB) Questionnaire

Objective: To help you evacuate quickly and survive independently for 72+ hours.

1. How many people (including pets) are in your household who need a BoB?
2. Do any household members have medical needs (e.g., prescriptions, mobility aids, allergies)?
3. What are the top 3 most likely hazards in your area requiring evacuation? Consider Natural, Manmade, and Technological hazards.
4. Where would you evacuate to in each case? (List locations if possible.)
5. Do you have enough water & food for 72 hours for each person?
6. What shelter & seasonal clothing do you need based on your location and climate?
7. Do you or family members require comfort or distraction items (e.g., child toys, pet gear)?
8. Do you have copies of ID, cash (small bills), and key documents packed?
9. Where is your BoB stored, and can you access it in 1 minute or less?
10. Have you conducted a practice evacuation using your BoB?

Get-Home Bag (GHB) Questionnaire

Objective: To help you safely return home on foot from work, school, or travel (10–30 miles).

1. How far is your daily commute from home (in miles)?
2. What is your most common mode of transportation? What if it became unavailable?
3. Could you walk home in your current work/school attire and shoes?
4. Do you carry or have access to basic water and food in your vehicle or workplace?
5. Do you know alternative walking routes home that avoid major highways or danger zones?
6. Do you have a local map and compass in your GHB—and know how to use them?
7. Do you have appropriate clothing, including seasonal and weather-related items?
8. Do you carry emergency contacts, a whistle, and basic self-defense tools?
9. Do you keep your GHB in your vehicle or with you at all times?
10. Have you ever tested walking a portion of your route home under realistic conditions?
